PARIAN CEMENT for internal use, to be PAINTED IN A FEW HOURS, AND PAPERED WITHIN A COUPLE OF DAYS.—CHARLES FRANCIS and SONS, Patentees, Nine Elms, London.

PORTLAND CEMENT, in Casks of Four Imperial Bushels. QUANTITY NOT WEIGHT. BEING THE STANDARD.—CHAS. FRANCIS and SONS, Cement Works, Nine Elms, London.

6, South Wharf, Paddington.

PORTLAND CEMENT.—CHARLES HARDEN has the greatest confidence to introduce to the trade the above superior CEMENT, being of uniform colour and quality in consideration never before attained in Portland Cements. It possesses extraordinary cementitious qualities, resists the action of fresh and salt water, and is more durable than any other Cement; does not vegetate, turn green, or crack, combining with which its eminent hydraulic properties stamp it at once as the first Cement of the day for work where all the above qualities are requisite. It is manufactured on the only principle Portland Cement can be, and contrary to the statements put forth by those who have hitherto supplied the Government, is measured by H. GREAVES, Esq., at his Works, near the River Avon, and sent to all parts of the kingdom per boat or rail, at a reduced price to the trade.

PATENT PORTLAND AND ROMAN CEMENTS.—Messrs. WINKFIELD, BELL, and CO., having now completed some heavy contracts, are prepared to execute orders to any extent for either of the above cements, which they are quite prepared to prove exceed any others in their representations and qualities at present manufacturing. Many highly respectable references can be given where their Cements have been successfully used. Orders addressed to their works will be punctually attended to, and terms cent. Where quantities are used, a corresponding price will be made. Agents liberally treated.—Address, W. C. WINKFIELD, BELL, and CO., Portland Cement Works, East Greenwich, Kent.—Agents wanted throughout the Kingdom and the Continent of Europe.

ROMAN AND OTHER CEMENTS, Manufactured by J. M. BLASHFIELD, successor to the Patentees, PARKER and WYATT, who, in 1796, first [illegible] PARKER'S ROMAN CEMENT; also Terras and [illegible] Cements, English and French Plaster, Terra Cotta Chimney Pots, Trusses, &c.

PERMANENT STUCCO WASH, WITHOUT SIZE OR OTHER CORRUPTIBLE INGREDIENT.

As used at St. George's Hospital, Hyde Park Corner.

JOHNS and CO. having effected some important improvements in the manufacture of this very useful material, confidently offer it to the notice of the Trade and the Public generally, as possessing greater advantages over the generality of Lime Wash or Colour for STUCCO or BRICK WORK. It is a Stone Colour, but may be tinted to any other—DOES NOT WASH OFF—is perfectly dry in twenty-four hours, and, being a non-conductor, is admirably adapted for Railway Stations, Manufactories, Barracks, Schools, Prisons, &c., one coat will cover 36 square yards. It will keep good for years, and MAY BE EXPORTED WITH PERFECT SAFETY.

JOHNS and CO.'S STUCCO CEMENT.—This cement, from the great reduction in price, and its suitableness for internal as well as external purposes, places it above all other materials of the kind; it has no cement qualities; may be painted or papered in a few days; never blisters, cracks, or vegetates; soon becomes as hard as stone; and may be cleaned with a brush and water.

The merits of the PAINT are well known for its application to stucco work of all kinds, and external work generally. Numerous testimonials, prospectuses, and further information may be obtained, on application to the Sole Agent, PHILIP HARE, at the Warehouse, 31, Steel-yard, Upper Thames-street. A liberal allowance to wholesale dealers.

MEDINA (ROMAN) CEMENT.—The Quarries of which this cement is made is obtained in the Isle of Wight. It was all the properties of the Sheppy Stone, but is much better adapted to engineering works, from the rapidity with which it sets and hardens under water. It has been long used at the great Breakwater at Charlestown, in a similar work at Aldernay; and at Dover new pier, to unite the masonry. The foundation of the centre pier of the Tubular Bridge at Menai Straits is laid in Medina Cement. A new process at Sandown, Isle of Wight, has been commenced of no other material but this cement and ore shingle. The work extends 200 feet into the sea, and is exposed to the most violent gales of the Channel, in a position where every former construction had been repeatedly washed away. The inconvenience of the varied qualities of Roman Cement are superseded by the use of this improved manufacture.

CHAS. FRANCIS and SONS, Nine Elms, London; or West Medina Mill, Newport, Isle of Wight.
